

Rhodamine WT sensor from Hydrolab submersible fluorometer

The rhodamine WT sensor from Hydrolab is based on the Turner Designs Cyclops-7 submersible fluorometer

Rhodamine WT Sensor	
Range	Low sensitivity: 0.04 ... 1000 ppb Med. sensitivity: 0.04 ... 100 ppb High sensitivity: 0.04 ... 10 ppb
Accuracy	± 3% for signal level equivalents of 1 ppb rhodamine WT dye or higher using a rhodamine sensor
Resolution	0.01 ppb
