

Li-Cor Ambient Light Sensor for Hydrolab Water Quality Sensors

Hydrolab's Ambient Light sensor, also called a Photosynthetically Active Radiation (PAR) sensor, provides a measurement of sunlight intensity at a specified point in the water column.

Li-Cor Ambient Light	
Range	0 ... 10,000 $\mu\text{mol s}^{-1}\text{m}^{-2}$
Accuracy	$\pm 5\%$ of reading
Resolution	1 $\mu\text{mol s}^{-1}\text{m}^{-2}$
